0028

15 MRS. MAC INTOSH: I'll go ahead.

16 MR. LUPTON: We'll take you first then. If
17 you'll state your name.

18 MRS. MAC INTOSH: Karoline MacIntosh from
19 White Pine County.

20 I have three issues with the project.

21 The first is I am a downwinder from the last
22 project that we were told it was okay, and it was not
23 okay, and I don't think that the research shows that
24 this project has been fully recognized that it is
25 totally safe for our health in this area, and we are an

0029

1 affected area with the transportation.

2 The second issue is how it will affect our
3 region economically. Because of the resource space
4 industries declining so much in this area, we are
5 transitioning into a cultural tourism base, and it's not
6 a high priority for people to come where we have
7 transportation of nuclear waste. So it will affect us
8 economically in a negative way.

9 The third issue I have is with the current

10 events in the world, with terrorism, and the third case
11 of anthrax has been diagnosed today, and who is to say
12 what will come next. But if we have these definite
13 groups with vehicles, I think we're just moving targets.
14 So in summary, I am fully against the project
15 coming in this area and Yucca Mountain being utilized
16 for the repository.
17 Thank you.
